WHY GET CERTIFIED?

Are you an IT professional looking to advance your career and increase expertise? Or a recent grad just starting an IT career? Recognized certifications and verifiable knowledge can help boost your resume to the top of the candidate stack. Certification can mean better job opportunities and increased income potential. NDG Linux courses are the fastest and most effective way to acquire proven Linux skills and get certified.

NDG INTRODUCTION TO LINUX I COURSE FEATURES

- Learn in-demand Linux skills and differentiate yourself in the job market for System Administrator or other IT roles. NDG Introduction to Linux I is your first step toward certification, followed by NDG Introduction to Linux II.

- The course includes content, lab exercises, assessments, and a live Linux environment. All you need is a web browser.

- Aligned to Linux Professional Institute's exams objectives for LPIC-1 Server Professional Certification. To obtain the LPIC-1 certification, you must pass Exam 101 and 102. This course is designed to prepare you for Exam 101, which covers:

  - System Architecture

  - Linux Installation and Package Management

  - GNU and Unix Commands

  - Devices, Linux File systems, File system Hierarchy Standards
